

NET CENTRIC SECURITY

SITUATIONAL AWARENESS FOR CRITICAL INFRASTRUCTURE

Saab has built on a global reputation for high quality command and control systems to provide complete integrated security solutions for corrections, airports, power stations and other critical infrastructure.

The Net Centric Security system integrates all facility security systems to provide a common situational picture for command centres and mobile security teams. The system includes alarm and response workflow management, automatic

positioning of units and alarms, CCTV management, reporting and statistics and all Sensors, Units, Alarms and other objects can be displayed in the context of the situational awareness picture (map).

Net Centric Security improves response times, enhances security team safety and reduces operating costs. ●●●●
